

Master of Science in Maritime Science

What?

A one-year advanced master programme organized by Ghent University and VUB, offering a unique multidisciplinary take on the maritime sector and serving as an excellent stepping stone for a professional career.

How?

The programme combines the different perspectives on maritime science through various courses, while linking theory to practice (and maintaining close interaction with the industry) via a wide array of study trips.

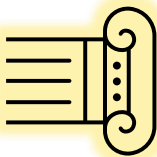

For whom?

Students and professionals who already obtained a master degree (or a four-year bachelor) and have a common passion for maritime transport, seeking to enhance their knowledge and skills in this field.

Want to know
more?

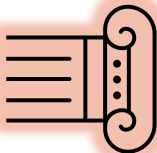

Three pillars of Maritime Science

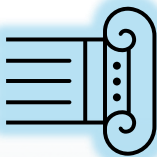

THE TECHNICAL/GENERAL PILLAR

Covering the technical infrastructure and scientific principles relevant to ports and ships, as well as current issues at play and port planning.

THE ECONOMIC/LOGISTIC PILLAR

Covering the economic and logistic considerations that guide and affect port authorities, shipping companies and transport firms.

THE LEGAL PILLAR

Covering the legal aspects of maritime transport, including the law of the sea, maritime law, transport law and other related fields.
